## EXPERIENCE

### Techversant Infotech Pvt Ltd, Cochin — Senior Software Engineer

AUGUST 2017 - PRESENT

## PROJECTS

**1. UnityLiving** project description: Apartment Management Software System Project Description: Secured cloud software for Apartment Management Committees & Property Managers. Private Social Networking for Residents. Apartment Management, Society Accounting and Communication Software for CHS. UnityLiving is a cloud software with mobile version for managing end to end activities of Apartments, Gated communities, condominiums, villas and Commercial Complexes.

**2. ERacks** project description: eRacks provides computer systems based on open source software, including various distributions of Linux, BSD and OpenSolaris, and manufactures rack-mounted servers (including firewalls, mail and web servers), desktops, laptops and netbooks E-commerce project. Worked on mainly devops tasks such as CI/CD.

**3. Lendsnap** project description: Lendsnap streamlines the mortgage application process, simplifying and gathering and sharing of required mortgage documentation between lenders and borrowers. It ultimately enables a simplified and more secure mortgage by removing the burden placed on consumers during the application process. By linking to consumer accounts, Lendsnap is able to gather employer and financial statements directly from the institutions, enabling a fast and simple integration to current origination procedures.
